Rigid Surface Marker

NSM1555 Rigid Surface Marker

The NSM1555 is a fully-sealed rigid Surface Marker manufactured from a rotationally moulded medium density polyethylene (MDPE).

With a wall thickness of 5mm and UV stability suited to Middle Eastern climates, the NSM1555 will provide years of reliable low maintenance service.

Commonly used to mark swim areas in beach surf, these handy markers can be used to mark a variety of applications.

Specifications
